THE EVOLUTION OF
OF A GREAT SYSTEM
SALTOProAccessSPACE Software

SALTO's ProAccess SPACE web-based software brings a new level of powerful flexibility to access control so that users can order the functionalities that they need most and upgrade accordingly as needs grow. In addition to the abundance of important new functionalities, SPACE also has a modern interface that is more user-friendly to help operators use the functions they need as quickly and intuitively as possible.

KEY FEATURES

- Web-based interface means no need to install the software on all client PCs. Also, an update of the server PC means that all client PCs are also updated.

- Can be managed or operated from different workstations simultaneously without risk of database corruption.

- Easy installation process that includes a powerful SQL engine. Database protected by SQL authentication or windows-based authentication.

- Multi-language and configurable interface makes it easy to adjust the interface to the specific needs and security level of each operator, including operator password protection for higher security.

- Operator's audit trail registers changes done by operators.

- Interface alerts to be aware of potential conflicts on the setup of the access plan or changes.

- Easy to upgrade to additional features to keep in-line with an installation's requirements.

- SALTO ProAccess SPACE software can also be used on Windows - based tablets.
